Investing involves risk, including loss of principal. The value of the fund's shares, when redeemed, may be worth more or less than their original cost. There is no guarantee that any investment strategy will achieve its objectives, generate profits or avoid losses. The Fund is newly formed and has limited operating history.

Shareholders should not expect to be able to sell their Shares regardless of how the Fund performs. An investment in the Fund is considered illiquid. The Fund's Board of Trustees has complete discretion to determine whether the Fund will engage in any share repurchase, and if so, the terms of such repurchase. No assurances can be given that the Fund will engage in a share repurchase in any given quarter and, in any case, repurchases will not begin until fifth full calendar quarter after the Fund has commenced operations.

The Fund is non-diversified, which means it is permitted to invest a greater portion of its assets in a smaller number of issuers than a "diversified" fund. For this reason, the Fund may be more exposed to the risks associated with and developments affecting an individual issuer than a fund that invests more widely. The Fund may also be subject to greater market fluctuation and price volatility than a more broadly diversified fund. Please refer to the fund's prospectus for these and other important risk considerations.
