The Adviser has contractually agreed to waive fees or reimburse expenses to limit total annual fund operating expenses (excluding management fees, Rule 12b-1 distribution and service fees, acquired fund fees and expenses, interest expenses, and certain extraordinary expenses) to no more than 1.00% of the Fund's average monthly net assets (the "Expense Cap"). ¹ Diversification does not ensure a profit or guarantee against loss. Real estate values rise and fall in response to a variety of factors, including local, regional and national economic conditions, interest rates and tax considerations. Fixed income investments are affected by a number of risks, including fluctuation in interest rates, credit risk, and prepayment risk. In general, as prevailing interest rates rise, fixed income prices will fall.² Represents the view of CAZ Investments as of March 31, 2026.

Overriding Principles

We invest our own capital

We always invest our personal capital alongside you. We have approximately \$650 million of our own capital committed to our investment vehicles.

We provide access to private investing

Because of the scale of the investments we make, we have access to opportunities generally only available to investors capable of committing more than \$100 million to a single investment, if at all.

We align our interests with our co-investors

In most cases, we are the largest investor in our vehicles. This ultimate alignment of interests is why we focus on finding better risk/reward opportunities.

Investors should consider the investment objectives, risks, and charges and expenses of the Fund(s) before investing. Risk Considerations:

Investing involves risk, including loss of principal. The value of the fund's shares, when redeemed, may be worth more or less than their original cost. There is no guarantee that any investment strategy will achieve its objectives, generate profits or avoid losses. The Fund is newly formed and has limited operating history.

Shareholders should not expect to be able to sell their Shares regardless of how the Fund performs. An investment in the Fund is considered illiquid. The Fund's Board of Trustees has complete discretion to determine whether the Fund will engage in any share repurchase, and if so, the terms of such repurchase. No assurances can be given that the Fund will engage in a share repurchase in any given quarter and, in any case, repurchases will not begin until fifth full calendar quarter after the Fund has commenced operations.

The Fund's distributions may be funded from unlimited amounts of offering proceeds or borrowings, which may constitute a return of capital and reduce the amount of capital available to the Fund for investment. Any capital returned to shareholders through distributions will be distributed after payment of fees and expenses. A return of capital to shareholders is a return of a portion of their original investment in the Fund, thereby reducing the tax basis of their investment. As a result of such reduction in tax basis, shareholders may be subject to tax in connection with the sale of Fund Shares, even if such Shares are sold at a loss relative to the shareholder's original investment.

The Fund is non-diversified, which means it is permitted to invest a greater portion of its assets in a smaller number of issuers than a "diversified" fund. For this reason, the Fund may be more exposed to the risks associated with and developments affecting an individual issuer than a fund that invests more widely. The Fund may also be subject to greater market fluctuation and price volatility than a more broadly diversified fund. Please refer to the fund's prospectus for these and other important risk considerations.
